

I am quite distressed that the FCC has not allowed much if any public debate concerning docket 02 277. I am a user of broadcast media, also a consumer of advertisers as are millions of Americans.

Not allowing people such as me information concerning this FCC law change is a blatant disregard to the American people who do not possess mass wealth from media corporations. A disregard for attempting to discern public opinion about 02-277 is unacceptable. We the people of the United States demand that the evolution of our airways include the public of millions needs and interests. Please make a change and act responsibly for our countries future.
